Drawing Celtic Knots on a square grid
Eowyn de Wever

Follow the steps from left to right.
1) Draw the bounding box.
2) Add a dot in the center of each square.
3 (and 4) Build up a basketweave pattern inside the bounding box.
5) Go round the corners and walls.
6) Colour in the background to make the knot pop.
Note: Knots can be transferred to scroll by taping the grid paper to the back of the scroll,
and pricking through both the paper and the scroll with a pin. After that the center dots
can be added and the knot drawn lightly, in pencil, on the front, before inking and colouring.
